HEALTH MEC TO LEAD A TEAM EMS PRACTITIONERS IN DECONTAMINATION OF EMS FLEET

Limpopo Health MEC Dr Phophi will lead a team of EMS practitioners in the decontamination of the EMS vehicle fleet. This is aimed at maintaining a healthy and clean environment within the workplace.

The routine practices in all the vehicles are that EMS practitioners do a normal cleaning of an ambulance after use with soap and water at all the respective EMS stations. This is followed with a disinfection per shift.

When the global community is experiencing the hard realities of Covid-19, the department started with the regular deep cleaning where vehicles are decontaminated in a 2 months cycle. The department is also paying special attention to the EMS ambulance and vehicle fleet.

The decontamination has been scheduled as follows:

Venue: Polokwane EMS Station

Date: 03 June 2020

Time: 14h00

End.
